Detailed Action

As per canceled claims 114—117:

Canceled claims 114—117 are missing from the instant application file wrapper.

Even though Applicant has now canceled these claims, a replacement sheet 80 is still required, as requested in the last office action. Either page 80 was missing as originally filed, or was lost within the PTO.

The scope of surrendered subject matter cannot be ascertained without a complete accounting of ALL claims presented in the instant patent application.

A replacement sheet 80, as originally filed, is required in response to this office action.

Improper claim numbering

The response received 7-12-2002 (Amendment B, paper 12) is not in compliance with 37 CFR § 1.126 - Numbering of Claims

The original numbering of the claims must be preserved throughout the prosecution. When claims are canceled the remaining claims must not be renumbered. When claims are added, they must be numbered by the applicant consecutively beginning with the number next following the highest numbered claim previously presented (whether entered or not). When the application is ready for allowance, the examiner, if necessary, will renumber the claims consecutively in the order in which they appear or in such order as may have been requested by applicant.

[32 FR 13583, Sept. 28, 1967; revised, 62 FR 53131, Oct. 10, 1997, effective Dec. 1, 1997]

Applicant has presented a set of new claims that are incorrectly numbered beginning with new claim 197. However, claim 124 was the last pending claim before entry of the amendment. Accordingly, new claims 197 – 251 have been renumbered by the Legal Instrument Examiner as new claims 125-179, respectively. **Accordingly, claims 70-75, 90-101, 110-113, and 125-179 are now pending.** Applicant's next response must be numbered to agree with the instant patent application file wrapper.

Claim Rejections - 35 U.S.C. § 112, second paragraph

Claims 70-75, 110-113, 125-144, and 165-179 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The **exemplary language**: “e.g., *RECORD and ARRAY*” or “e.g., *Value*” or “e.g., *Record*” or “e.g., *Null or Object*” renders the claims indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention or not, and the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. The use of **exemplary language** “for example” or “such as” was found to be indefinite in the following cases: Ex parte Hall, 83 USPQ 38 (Bd. App. 1949); Ex parte Hasche, 86 USPQ 481 (Bd. App. 1949); Ex parte Steigerwald, 131 USPQ 74 (Bd. APP. 1961).

In general, the use of **exemplary language**: “for example,” “such as,” “... or the like,” or, “for instance, ...” is considered indefinite when recited in claims. The use of **exemplary language** in the claims creates ambiguity. Description of examples or preferences is properly set forth in the specification rather than the claims. Examples and preferences set forth within the body of the claim lead to confusion over the intended scope of the claim.

All claims that depend upon indefinite independent claims also stand rejected under 35 U.S.C. § 112, second paragraph. Appropriate correction is required.

Allowable claims

Claims 90-101, and 145-164 appear to be allowable over the prior art of record, subject to the results of a final search by the Examiner.

RULE 1.105 REQUEST FOR INFORMATION

Applicant and the assignee of this application are required under 37 C.F.R. §1.105 to provide the following information that the examiner has determined is reasonably necessary to the examination of this application. SPE authorization has been granted for this RULE 1.105 request.

The information is required to extend the domain of search for prior art. Limited amounts of art related to the claimed subject matter are available within the Office, and are generally found in class 709/330, which describes remote procedure calls. A broader range of art to search is necessary to establish the level of knowledge of those of ordinary skill in the claimed subject matter art of XML as used with remote procedure calls. The information is required to document the level of skill and knowledge in the art of XML as used with remote procedure calls.

- In response to this requirement, please provide the citation and a copy of each publication that any of the applicants relied upon to draft the claimed subject matter. For each publication, please provide a concise explanation or the reliance placed on that publication in distinguishing the claimed subject matter from the prior art.
- In further response to this requirement, please provide the names of any products or services that have incorporated the claimed subject matter.
- In further response to this requirement, please provide the citation and a copy of each publication which any of the applicants authored or co-authored and which describes the disclosed subject matter of XML as used with remote procedure calls.
- In further response to this requirement, please state the specific improvements of the claimed subject matter in all independent claims over the disclosed prior art and indicate the specific elements in the claimed subject matter that provide those improvements. For those claims expressed as means or steps plus function, please provide the specific page and line numbers within the disclosure that describe the claimed structure and acts.

In responding to those requirements that require copies of documents, where the document is a bound text or a single article over 50 pages, the requirement may be met by providing copies of those pages that provide the particular subject matter indicated in the requirement, or where such subject matter is not indicated, the subject matter found in Applicant's disclosure.

The applicant is reminded that the reply to this requirement must be made with candor and good faith under 37 C.F.R. §1.56. Where the applicant does not have or cannot readily obtain an item of required information, a statement that the item is unknown or cannot be obtained will be accepted as a complete response to the requirement for that item.
